Domain. The psychomotor domain (Simpson, 1972) includes physical movement, coordination, and use of the motor-skill areas. Development of these skills requires practice and is measured in terms of speed, precision, distance, procedures, or techniques in execution. Thus, psychomotor skills range from manual tasks, such as digging a ditch or washing a car, to more complex tasks, such as operating a complex piece of machinery or dancing.

Psychomotor Domain Hierarchy; Level
Definition Example; Observing: Active
mental attending of a physical event.
The learner watches a more experienced
person. Other mental activity, such as
reading may be a part of the observation
process. Imitating: Attempted copying of
a physical behavior. The second step in
learning a psychomotor skill.

Psychomotor Objectives

There are three main domains of
learning and all teachers should know
about them and use them to construct
lessons. These domains of learning are
the cognitive (thinking), the affective
(social/emotional/feeling), and the
psychomotor (physical/kinesthetic)
domain, and each one of these has a
taxonomy associated with it.
