1.2 Alluvial processes and deposits.
Alluvial deposits (or alluvium) result from . processes associated with flowing water, usually but not exclusively associated with river valleys. River valleys contain numerous micro-environments (Fig 4), each of which is associated with distinctive suites of deposits that can be

Geoarchaeology - Historic England

Soils and sediments on and below these surfaces contain important buried sites. The erosion and burial agents common along alluvial fans and other high energy depositional environments are also visible in profiles and these sediments can be discriminated from archaeological materials.
