involved in striving for greater energy efficiency in buildings—particularly through codes and standards. This tool is designed for multiple uses

Building Energy Codes 101: An Introduction

Building Energy Codes 101. The Building Energy Codes 101 family of products provide a basic introduction to the varied and complex issues associated with building energy codes. The materials for this course may be used for in-person training purposes. Course materials originally published by the DOE Building Energy Codes Program, July 16, 2010.

Building Energy Codes 101 | Building Energy Codes Program

Energy codes are just one of many building codes, such as fire, electrical, structural, or plumbing. Energy codes are different than appliance and equipment standards. Energy codes cover the building itself—for example, the walls/floors/ceiling insulation, windows, air leakage, and duct leakage. Appliance and equipment standards cover the things that go into the buildings. However, there is some overlap, particularly in lighting. Now, here are the three key primary components of the energy ...
