Kobo Reading App: This is another nice e-reader app that's available for Windows Phone, BlackBerry, Android, iPhone, iPad, and Windows and Mac computers. Apple iBooks: This is a really cool e-reader app that's only available for Apple

Database Developer Guide

A database developer is an IT professional who is responsible for creating databases and database software. They design databases and work on the code that sits between an application and the data in a database. Database developers, or database programmers, often work in an IT department as part of a software development team.

Developer Guide Overview We cover a variety of topics - from understanding graph database concepts to building applications that interact with Neo4j to running Neo4j in production. Videos, text, examples, and code are just some of the formats in which we deliver the information to encourage you and aid all learning styles.

Getting Started with Neo4j - Developer Guides

Very simply, a graph database is a database designed to treat the relationships between data as equally important to the data itself. It is intended to hold data without constricting it to a pre-defined model. Instead, the data is stored like we first draw it out - showing how each individual entity connects with or is related to others.

What is a Graph Database? - Developer Guides

Learn about Salesforce Apex, the strongly typed, object-oriented, multitenant-aware programming language. Use Apex code to run flow and transaction control statements on the Salesforce platform. Apex syntax looks like Java and acts like database stored procedures. Developers can add business logic to most system events, including button clicks, related record updates, and Visualforce pages.
