Sine, Cosine and Tangent And Sine, Cosine and Tangent are the three main functions in trigonometry. They are often shortened to sin, cos and tan. The calculation is simply one side of a right angled triangle divided by another side... we just have to know which sides, and that is where "sohcahtoa" helps.

Common Questions. Q: Is sohcahtoa only for right triangles? A: Yes, it only applies to right triangles. If we have an oblique triangle, then we can't assume these trig ratios will work. We have other methods we'll learn about in Math Analysis and Trigonometry such as the laws of sines and cosines to handle those cases.

SOHCAHTOA Explained (19 Step-by-Step Examples!)

Answer: $\sin \theta = 3/5 = 0.6$. $\cos \theta = 4/5 = 0.8$. $\tan \theta = 3/4 = 0.75$: This triangle is oriented differently than the one shown in the SOHCAHTOA diagram, so make sure you know which sides are the opposite, adjacent, and hypotenuse.

Most SAT trigonometry questions are based on trigonometric ratios, which are the relationships between the angles and sides of a right triangle in terms of one of its acute (less than 90 degrees) angles. You can answer almost every SAT trig question by using the mnemonic device for the three basic trigonometric ratios: SOH CAH TOA.
