History of international code of botanical nomenclature 1

International Code of Botanical Nomenclature A set of rules for the formal naming of plants, accepted by botanists, in which the underlying principle is the allocation of a single, unambiguous name to each taxon. The Code comprises a set of 6 Principles to guide those who are selecting a new name, 75 Articles, and a number of Recommendations.

International Code Of Botanical Nomenclature ...

Principles of International Code of Botanical Nomenclature, (ICBN): I. Botanical nomenclature is independent of zoological nomenclature. The code applies equally to names of taxonomic groups treated as plants whether or not these groups were originally so treated (Plants do not include Bacteria).

International Code of Botanical Nomenclature (ICBN) | Taxonomy

International Code of Botanical Nomenclature, commonly abbreviated as ICBN. In Melbourne, reflecting the view, particularly amongst mycologists, that the word "Botanical" was misleading and could imply that the Code covered only green plants and

International Code of Nomenclature

This code is called the International Code of Botanical Nomenclature (ICBN). The modifications or amendments as suggested by the International Botanical Congress at the subsequent meetings have been incorporated in the ICBN on a regular basis. (i) Paris Code (1867):

ICBN:International Code of Botanical Nomenclature

The starting point for modern botanical nomenclature is Linnaeus' Species Plantarum of 1753. Botanical nomenclature is governed by the International Code of Nomenclature for algae, fungi, and plants (ICN), which replaces the International Code of Botanical Nomenclature (ICBN). Fossil plants are also covered by the code of nomenclature.
