International Trade as an Engine of Growth - Term Paper

The 2002 Monterrey Consensus identifies international trade as an engine for development as the third of six "leading actions" or pillars in support of financing for development (FfD). The Consensus sets out a broad range of actions, recommendations, and commitments by both developing and

developed countries toward the objective of trade playing its full part in promoting economic growth, employment and development for all.

International Trade as an Engine of Growth for Development

The classical and neoclassical economists believed that international trade played a vital role in accelerating economic growth of the countries. In fact they called international trade as an 'engine of economic growth'. The contribution of trade to economic growth, according to them, is determined partly from static and partly from dynamic gains that flow from foreign trade.

What Is International Trade? - Investopedia

International trade, however, refers specifically to an exchange between members of different nations, and accounts and explanations of such trade begin (despite fragmentary earlier discussion) only with the rise of the modern nation-state at the close of the European Middle Ages. As political thinkers and philosophers began to examine the nature and function of the nation, trade with other countries became a particular topic of their inquiry.
