### **Self-Determination Theory and the Facilitation of ...**

Intrinsic motivation involves engaging in a behavior because it is personally rewarding; essentially, performing an activity for its own sake rather than the desire for some external reward. Essentially, the behavior itself is its own reward. 2

### **Differences Between Extrinsic and Intrinsic Motivation**

Intrinsic motivation, performance, and the mediating role of mastery goal orientation: a test of self-determination theory Although intrinsic motivation has been linked repeatedly to performance and outcomes, the causal relationship between the two has remained unclear.

### **Intrinsic motivation, performance, and the mediating role ...**

Self-Determination Theory (SDT) is a macro theory of human motivation and personality that concerns people's inherent growth tendencies and innate psychological needs. It is concerned with the motivation behind choices people make without external influence and interference. SDT focuses on the degree to which an individual's behavior is self-motivated and self-determined.

### **Self-determination theory - Wikipedia**

Intrinsic motivation is relaxed willingness to act with full and unconflicted approval. The central concept in self-determination theory is intention. Volitional engagement in behavior with a relaxed willingness to act with full and unconflicted approval, is the cornerstone of intrinsic motivation (Ryan & Deci, 2000).
