### What is HP LoadRunner Testing Tool? Architecture, Components

LoadRunner Professional reproduces real business processes. Scripts can be easily modified to emulate real user behavior. It emulates hundreds or thousands of concurrent virtual users, (with minimal hardware), to apply accurate workloads to any application and capture end-user response times for business processes and transactions, ensuring that applications meet requirements.

### LoadRunner: Application Load Testing Tools | Micro Focus

HP LoadRunner works by creating virtual users who take the place of real users operating client software, such as Internet Explorer sending requests using the HTTP protocol to IIS or Apache web servers. Requests from many virtual user clients are generated by "Load Generators" in order to create a load on various servers under test.
