Math Field Trip: A Grade-Raising Math Dictionary For ...

After 4 girls leave and 6 boys leave, we can represent the number of girls and the number of boys as $3x - 4$ and $4x - 6$, respectively. We are told that the ratio becomes $4/5$ when the field trip students leave, thus we can set up the equation $(3x - 4) / (4x - 6) = 4/5$. Now, we cross-multiply and solve for x.

Field Trips | MATHCOUNTS

A math trail is an activity that gets students out of the classroom so they can (re)discover the math all around us. Whether out on a field trip or on school grounds, students on a math trail are asked to solve or create problems about objects and landmarks they see; name shapes and composite solids; calculate areas and volumes; recognize properties, similarity, congruence, and symmetry; use number sense and estimation to evaluate large quantities and assess assumptions; and so on.
