Every top scow sailor knows that heel angle is the single most important aspect of speed. In his book Sailing Smart, Buddy Melges states "This [heel] angle varies quite widely class to class or from one design to another, but it always applies, no matter how strong or weak the wind." Heel angle is important for a number of reasons, but primarily because it controls the angle of the board in ...

S# first appeared (that we know of) in TellTales, April 1988, "On a Scale of One to Ten" by A.P. Brooks . The equation incorporates SA/Disp (100% fore triangle) and Disp/length ratios to create a guide to probable boat performance vs. other boats of comparable size. For boats of the same length, generally the higher the S#, the lower the PHRF.

By Scott & Joanne Callahan (August, 1993)When racing in a one design sailboat, such as an M-Scow, it's very important to have a competitive boat. Competitive is comprised of four basic elements: the boat, the crew, the conditions, and the competition. In order to be fast on all points of sail, the boat must be sound and fair.
