The heart has two upper chambers, the right and left atria, which perform about 30% of the work, and two larger, lower chambers, the right and left ventricles, which perform the other 70% of the work. The left ventricle is the largest and most muscular chamber, because it works harder than the others.

We are born to move, but learn to move skillfully. When people run, walk with an artificial limb, throw a baseball, hit a tennis ball, play the piano, dance, or operate a wood lathe, they are engaged in the performance of a type of human behavior called motor skills. Every motor skill in our repertoire is the product of a long and often arduous process of acquisition.

During the Persian Gulf War of Iraq-Iran (1980-1988), thousands of Iranians were taken captive by Iraqi troops. These prisoners of war (POWs) had to find ways to enrich and fill their time in prison camps. Learning English was one such activity. This study was carried out to appraise the motivations of the Iranian POWs for learning English, and to understand more about their textbooks, their ...
