Forecasting change in military technology, 2020-2040

The Military Revolution is the theory that a series of radical changes in military strategy and tactics during the 16th and 17th centuries resulted in major lasting changes in governments and society. The theory was introduced by Michael Roberts in the 1950s as he focused on Sweden 1560–1660 searching for major changes in the European way of war caused by introduction of portable firearms. Roberts linked military technology with larger historical consequences, arguing that innovations in ...
