Otitis externa, also called swimmer's ear, is inflammation of the ear canal. It often presents with ear pain, swelling of the ear canal, and occasionally decreased hearing. Typically there is pain with movement of the outer ear. A high fever is typically not present except in severe cases.

Otitis externa - Wikipedia

As previously mentioned, otitis externa is an infection of the outer ear. It's called swimmer's ear because it often occurs when contaminated water sits in the outer ear and creates a suitable environment for bacteria to grow. 2 The main focus of treating otitis externa is the treatment of the infection.
