Perceived Exertion | RehabMeasures ...

The RPE scale is used to measure the intensity of your exercise. The RPE scale runs from 0 - 10. The numbers below relate to phrases used to rate how easy or difficult you find an activity. For example, 0 (nothing at all) would be how you feel when sitting in a chair; 10 (very, very heavy) is how you feel at the end of an

Rated Perceived Exertion (RPE) Scale

The reason the scale begins at 6 and ends at 20 is because these values represent the resting heart rate (about 60 beats per minute) and maximal heart rate (about 200 beats per minute) of a healthy young adult. So that means 6 would equal sitting at rest, while 20 would be all-
