ESA - International Space Station (ISS)

The International Space Station programme is tied together by a complex set of legal, political and financial agreements between the sixteen nations involved in the project, governing ownership of the various components, rights to crewing and utilization, and responsibilities for crew rotation and resupply of the International Space Station. It was conceived in 1984 by President Ronald Reagan, during the Space Station Freedom project as it was originally called. These agreements tie together the

International Space Station programme - Wikipedia

The applications and uses of satellite remote sensing have burgeoned during the last decade and the associated legal aspects of satellite remote sensing have become increasingly important, however, the legal regime in this area is surprisingly inadequate.
