The Economics Of Development Planning

Development economics is a branch of economics which deals with economic aspects of the development process in low income countries. Its focus is not only on methods of promoting economic development, economic growth and structural change but also on improving the potential for the mass of the population, for example, through health, education and workplace conditions, whether through public ...

Development Economics Definition

The Human Development Index (HDI) is the normalized measure of life expectancy, education and per capita income for countries worldwide. It is an improved standard means of measuring well-being, especially child welfare and thus human development. Although this index makes an effort to simplify human development, it is much more complex than any index or set of indicators.

Human development (economics) - Wikipedia

Sustainable development is an approach to economic planning that attempts to foster economic growth while preserving the quality of the environment for future generations. Despite its enormous popularity in the last two decades of the 20th century, the concept of sustainable development proved ...
