situational and can be planned, whereas transition is psychological and less easy to manage.

Transitions: The Personal Side of Change - TRG

Transitions involve a change or discontinuity in a person's life which typically requires new behaviours and attitudes and involves changed assumptions. Transitions may be voluntary (you decide to change job, move house, get married) or involuntary (you lose your job, are severely injured, your partner leaves you).

Personal)transitions)

The Bridges Transition Model helps organizations and individuals understand and more effectively manage and work through the personal and human side of change. The model identifies the three stages an individual experiences during change: Ending What Currently Is, The Neutral Zone and The New Beginning.

Bridges Transition Model | William Bridges Associates

Like good strategic thinkers, those who accept and manage personal change well are those who are clear about what they want. They are quick to decide what they cannot change, and to put it to one side. They are also effective in taking the necessary steps towards change and taking control of those elements that they can change.
